
Table of Automatic Accreditation of Prior Learning 2017-18

This table is only applicable for students registered for Standard Route degrees in the fields of Economics, Management, Finance and the Social Sciences (EMFSS).

Last updated: 5 June 2017

Accreditation of prior learning (APL)* is the recognition of previously acquired learning which can be mapped against particular learning outcomes of courses within a programme. If you are awarded APL for a specific course you will be exempt from taking this course. It means you are considered to have completed the course for the purposes of progression within the programme. The mark obtained for a qualification for which APL has been awarded will not be carried forward to your record and will not contribute towards the award.

The University reserves the right not to award APL if the qualification of the respective professional body or institution changes after the publication of this list.

The deadline to apply for APL to be considered for the upcoming academic year is **1 October**.

Further information on rules regarding APL is covered in Section 2 of the [Programme Regulations](#) and Section 3 of the [General Regulations](#). Information on how your degree classification is calculated when you have been awarded APL is available in Section 5 of Appendix D - Scheme of award in the [Programme Regulations](#).

*APL, also known as Recognition of prior learning, has previously been called 'exemption' by the University of London International Programmes.
